## **Swiss Participations in the R+D Framework Programs of the European Union:**

The EU participation list has a similar structure but covers all Swiss participations as listed in CORDIS database between the years 2000 and March 2010. The list contains about 1060 organisations with 4'870 Swiss participations. The regional analyses have been done for all EU participations as well as for the industrial participations only. Characteristic are the very strong extremes, some regions/cantons are responsible for the majority of the participations, and others remain for years at a very low participation level.

The CTI/KTI list and the EU list cannot be directly compared due to a different systematic used for the organisation names.
